

Petition for a Private Bill: to apply HL Health Board CIC to the Standing Orders for Private Bills, Business 2024 - 2025

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled,

The Humble Petition of Lord Lancelot Junior Webb, Karmel Swaby McCartney, Directors of HL Health Board CIC

sheweth,

That there is a pressing need to address the health management, maintenance, and construction of harbours, docks, and piers under the authority of a Harbour Revision Order, in alignment with Standing Orders for Private Bills, Business 2024.

This is to ensure equitable and sustainable development, particularly to benefit the Windrush Generation and their descendants, who have contributed significantly to the nation's maritime and industrial heritage.

Your petitioners respectfully submit that the lack of specific provisions in the current framework has resulted in disparities and inefficiencies in harbour infrastructure development, impacting communities reliant on these facilities for commerce, travel, and cultural connection.

Wherefore, your petitioners pray that your Honourable House do enact a Private Bill to:

1. **Authorize revisions to harbour, dock, and pier management practices** to incorporate inclusive policies that reflect the contributions of the Windrush Generation.
2. **Establish sustainable and equitable maintenance programs** ensuring accessibility and safety for all users.
3. **Facilitate new construction projects** that prioritize economic opportunities, cultural representation, and environmental sustainability.
4. Create a consultative board with representation from the Windrush Generation and their descendants to oversee these developments.

And your petitioners, as in duty bound, will ever pray.

Signatories:

Director Lord Lancelot Junior Webb –

Director Karmel Swaby McCartney –
